

L.B. Plastics, Inc., Celebrates 30th Anniversary

May 11, 2007, Mooresville, NC – Located in Mooresville, North Carolina, L.B. Plastics, Inc., prepares for its 30th anniversary. The company is a subsidiary of L.B. Plastics, Ltd. of Derby, England, part of the Litchfield Group, and has sister plants located in Germany, Poland and Australia.

Founded in 1977, L.B. Plastics, Inc., initially extruded a range of Drawer Systems to serve the furniture and kitchen cabinet industries. Over the ensuing years, the company redesigned and marketed a wide range of proprietary products including Sheerframe[®] Window and Door Systems and Sheerline[®] Decking, Railing and Cladding Systems.

Today L.B. Plastics, Inc., is recognized as an innovator and leader in the building products industry for its design and manufacture of premium, low maintenance vinyl railing, post clad, decking and related products. The company offers a comprehensive line of styles and colors engineered for lasting beauty and ease of installation, and includes several patented products. L.B. Plastics, Inc., uses the latest CAD Systems, engineering tools and technology to design and manufacture all of its products to exceed Building Code requirements, as well as having products independently tested and certified.

A segment of the company's business is dedicated to custom extrusion, moving a customer's concept to reality. The L.B. Plastics, Inc., Design and Engineering team works one-on-one with customers to design parts and develop tooling to extrude a large variety of custom profiles ranging from simple angles to the largest hollow-webbed profile yet produced by any custom profile extruder.

In addition to growing and evolving its product line, L.B. Plastics, Inc., has also grown its manufacturing and warehousing capabilities in Mooresville, North Carolina, to better serve its customers. The company has expanded from its original 20,000 square foot building built in 1977 by adding buildings in 1979, 1984, 1986, 1995, 1998, 2000, 2002 and 2007. This latest addition brings the total manufacturing and warehousing space to 324,000 square feet. L.B. Plastics, Inc., operates seven days a week with 40 extrusion lines and 6 injection molding units producing high quality products to the most exacting customer requirements.
