### **L.B. PLASTICS SERIES 3000 AND 3250 RAILING PRODUCTS RECEIVE NEW ICC-ES CODE CERTIFICATION**

February 6, 2009 – L.B. Plastics, a leader in premium outdoor vinyl building products with more than 50 years experience, has received the AC-174 code approval from the International Code Council-Evaluation Service for its Sheerline 3000 and 3250 series railings.

ICC-ES is the U.S. leader in evaluating building products for compliance with code. The ICC-ES evaluation provides the most recognized evidence and documentation that products and systems are code-compliant.

“The AC-174 certification means that our railings meet this most current and rigorous code,” said Ted Davis, national sales and marketing manager for L.B. Plastics. “The testing and certification process allows us to provide products with greater safety ratings to benefit our customers. We are pleased that our railings have exceeded the requirements needed to receive this designation.”

Sheerline railing is available in 4', 6', 8', and 10' sections that can be tailored easily on-site to fit almost any application. Both the Series 3000 and 3250 are available with hidden fasteners for a clean, stylish look. The 3250 Series is offered in white, beige and clay and the 3000 Series is offered in white and beige.

L.B. Plastics manufactures railing, decking and fencing, as well highly specialized PVC custom extrusions and industrial matting. Its state-of-the-art manufacturing facility is located in Mooresville, North Carolina.
