### **L.B. PLASTICS OFFERS**

#### **NEW SHEERLINE® SCREEN CLAD RAIL KIT**

October 3, 2008 – L.B. Plastics, a leader in premium outdoor vinyl building products with more than 50 years experience, has introduced a new railing solution for screened porches.

The Rail Kits, designed for use with the screen cladding system, are one of the newest additions to the L.B. Plastics Sheerline® product line. The kits are easy to install and provide additional safety without dramatically reducing airflow or the view.

“This product is a natural fit with our already successful screen cladding product line and gives a sturdy simple solution in one kit,” said Ted Davis, national sales and marketing manager for L.B. Plastics.

The Screen Clad Rail Kits are available in 4-foot and 5-foot widths and a 38-inch height. The kit easily installs underneath the midrail and atop the sill to complete the look of a screened exterior application.

L.B. Plastics manufactures railing, decking and fencing, as well highly specialized PVC custom extrusions and industrial matting. Its state-of-the-art manufacturing facility is located in Mooresville, North Carolina, which is also the company’s corporate headquarters.
